Introduct

What can BT-Pusher Bluetooth Marketing System bring to you?

1. Are you worrying about printing, distributing leaflets? Do you want your shop to be remembered by every passenger? BT-Pusher Bluetooth Marketing System utilizes the Bluetooth technology, it can help you find every potential customer and send leaflets, e-coupons and so on, to customers directly.
2. Do you want you company to stand out in the crowd? Do you want to arm your company with hi-tech products? BT-Pusher Bluetooth Marketing System make your customers fell that your company is keeping up with the pulse of the digital world, so that it can improve the image of your company in the eyes of customers.
3. Do you want to distribute leaflets every day for free? With the help of BT-Pusher Bluetooth Marketing System, you can do this 24 hours non-stop.
4. Are you wondering how come just some customers give feed-back while you have distributed thousands of cards? Just because even customer themselves don't know where the card is. So, what can we do? With BT-Pusher Bluetooth Marketing System, you can send an e-card with your phone number, fax, web-site, email, IM number and so on, into the mobiles of customers directly. As long as your e-card is accepted and saved in the mobiles of customers, your business will be boosted with no doubt.

What are the advantages of BT-Pusher Bluetooth Marketing System?

1. With the leading single-point-multi-receiving technology, receiving multi files just in one single click.
2. With the creative files sending forecast technology, what to be sent are straightforward, make your customers fell more friendly and comfortable.
3. BT-Pusher Bluetooth Marketing System can send a batch of files to multi customers simultaneously with just several clicks.
4. Files sent results statistics in pie chart, what is popular is intuitively clear.

Functionalities

1. Search the Bluetooth clients (mobiles e.g.) within (about 30 meters) automatically.
2. Establish link with Bluetooth clients (mobiles e.g.) and send files automatically.
3. Sending to seven Bluetooth clients simultaneously.
4. All formats are supported: text, image(jpg, gif, png, e.g.),mp3, mp4, 3gp, e.g.
5. As fast as 100kB/s, depends on the Bluetooth class of mobile and actual environment.
6. Transport distance: 30 meters (in radius) in open environment.
7. Non-stop searching, no duplicated sending.

Field Of Application:

1. restaurants, hotels
2. shops, malls
3. exhibitions
4. waiting room, departure hall
5. reception room
6. cinema, recreation center

Illustration:

The screenshot shows the BT-Pusher Bluetooth Marketing System interface. It includes a menu bar with options like Broadcast, Monitor, Singlecast, Lottery, GIF, Charts, BlackList, and Config. The main area is divided into sections for Greeting Message, Broadcast File List, and a status bar at the bottom.

Callouts and their corresponding elements in the interface:

- Bluetooth status icon:** A Bluetooth symbol icon in the top left corner.
- Number of clients are online:** The number '2' displayed above the device list.
- Bluetooth clients: The software will search for clients dynamically:** A list of devices, including 'pal' with MAC address '68967CC'. A right-click menu is open over this device, showing options like 'Send Msg', 'Send File', 'Send Vcard', 'Lottery', 'Make GIF', and 'Add To Blacklist'.
- The adapter status:** A status bar at the bottom left that reads 'Bluetooth Adapter Is Ready'.

The Greeting Message section contains fields for 'Msg Head' (Welcome To DeviceGate .TXT) and 'Msg Body' (Welcome To DeviceGate Today is 2010-5-14 Friday. It my greate honour to introduce our company for you: 1. " Blue hills.jpg" --- blue hills 2. " Sunset.jpg" --- do you like sunset, enjoy it 3. " Water lilies.jpg" --- a very beautiful picture). There are also checkboxes for 'Calendar' and 'File Forecast'.

The Broadcast File List section contains a table with columns 'File Name' and 'Description':

File Name	Description
Blue hills.jpg	blue hills
Sunset.jpg	do you like sunset, enjoy it
Water lilies.jpg	a very beautiful picture
Winter.jpg	winter show
red flash.jpg	
leao iced tea.jpg	
andina fresh.jpg	
andina frut .jpg	

Buttons for 'Add', 'Remove', 'Up', and 'Down' are located to the right of the table. The status bar at the bottom shows 'Broadcast 1 h 43 m', a play button, 'Send 45 Files', and 'Enterprise Edition'.

Searching

The screenshot shows the BT-Pusher Bluetooth Marketing System interface. At the top, there are tabs for Broadcast, Monitor, Singlecast, Lottery, GIF, Charts, BlackList, and Config. The main window is titled "Greeting Message" and contains several fields and options:

- Msg Head:** A text field containing "Welcome To DeviceGate" and a ".TXT" extension. A callout points to this field with the text "Title of the greeting message".
- Msg Body:** A section with "Start" and "End" text boxes. The "Start" box contains "Welcome To DeviceGate" and the "End" box contains "Have a nice day! DeviceGate". A callout points to the "Edit" radio button with the text "Edit or preview the greeting message".
- File Forecast Prefix:** A text area containing "It my greate honour to intorduce our company for you:". Below this are two checked checkboxes: "Calendar" and "File Forecast". A callout points to these checkboxes with the text "Calendar and file forecast".
- Broadcast File List:** A table with two columns: "File Name" and "Description". The table contains several entries:

File Name	Description
Blue hills.jpg	blue hills
Sunset.jpg	do you like sunset, enjoy it
Water lilies.jpg	a very beautiful picture
Winter.jpg	winter show
red flash.jpg	
leao iced tea.jpg	
andina fresh.jpg	
andina fruit .jpg	

 To the right of the table are buttons for "Add", "Remove", and "Up". A callout points to the "Add" button with the text "add or delete multi files by pressing 'ctrl'". Another callout points to the "Description" column with the text "You can add files or modify the description by double click relevant the column".
- Start Button:** A large blue play button icon at the bottom center. A callout points to it with the text "Press to start".

At the bottom of the window, it displays "Broadcast 1 h 43 m" and "Send 45 Files". The status bar at the very bottom shows "Bluetooth Adapter Is Ready" and "Enterprise Edition".

Bluetooth Adapter Is Ready Enterprise Edition

Single cast

The screenshot shows the 'Lottery' tab in the BT-Pusher software. On the left, a list of devices is shown with 'pal' and '68967CC48C17443' selected. The main area is titled 'Prepare Lottery Message' and contains a 'Count' dropdown set to '1', a checkbox for 'All Mobiles Are Included', a 'Msg Head' field with 'Congratulations .TXT', and a 'Msg Body' field with 'Thanks for your attribution'. Below this is a 'Start Lottery' button. At the bottom, a table displays the results of the lottery draw.

Status	Device Name	Message	Result
1 Win	pal	Congratulations	Succeed
1 Win	68967CC48C17443	Congratulations	Succeed
1 Win	68967CC48C17443	Congratulations	Connection Fail

Bluetooth Adapter Is Ready Enterprise Edition

1: select the number of winners

2: set the winning message

3: start to draw the lottery

4: the winners will be displayed here

Lottery

The screenshot shows the BT-Pusher Bluetooth Marketing System interface. At the top, there are tabs for Broadcast, Monitor, Singlecast, Lottery, GIF, Charts, BlackList, and Config. The 'GIF' tab is selected. On the left, a device list shows 'pal' with ID '68967CC48C17'. A context menu is open over the device list with options: Send Msg, Send File, Send Vcard, Lottery, Make GIF, and Add To Blacklist. The main area displays a preview of a GIF with a resolution of '200 * 150'. Below the preview are buttons for 'Add Picture', 'Left', 'Right', and 'Remove Picture'. At the bottom, there are settings for 'Transition' (checked), 'Page Time' (1 sec), and 'Name' (andina fresh). A large blue arrow button is highlighted. To the right of the settings are buttons for 'Send To Mobile', 'Broadcast', and 'Open Folder'. The status bar at the bottom indicates 'Bluetooth Adapter Is Ready' and 'Enterprise Edition'.

Generate e-card and add to the broadcast list

The default password when some mobile need authorization

The time that clients need to response to greeting message

The times clients need to reject a file before advertiser stop sending

System Config

Q & A

1. Q: Can't run the software?

A: Probably because you have not installed the JRE1.6, please browse the disc and find "JRE_update.exe", double click it and install.

2. Q: Bluetooth adapter is not ready?

A: Make sure the Bluetooth adapter is inserted correctly.

3. Q: Unable to save the broadcast list?

A: The broadcast list is saved automatically when system begins to broadcast, if you want to save it, just click the "broadcast" button.

4. Q: What shall it fill in if I don't have web site or email?

A: Leave it blank.

5. Q: If I have two mobile phones, where should I fill the second number?

A: You can fill it in the "landline phone" column.

6. Q: Why can't it start when I log on windows?

A: Probably because you have installed some kind of registry monitor software. You need to stop the registry monitor software and run the setup again. When the setup is finished, start the registry monitor software again.

7. Q: What does Bluetooth time out mean?

A: It means that, BT-Pusher Bluetooth Marketing System has already established a link with the client (mobile e.g.), but customer didn't response to it in a specific time period (30 seconds). If someone didn't notice the file-receiving notification in that time period, this message will appear.

8. Q: What does “reject Limit” mean?

A: BT-Pusher Bluetooth Marketing System is user-friendly software. When customers don't realize this kind of advertising or the benefit of Bluetooth advertising, for the sake of security, they probably will reject receiving the file. If customer rejects, then BT-Pusher Bluetooth Marketing System will stop sending. But when the customer comes again next time, BT-Pusher Bluetooth Marketing System will try to send file to him again. When the same customer rejects for 3 times, BT-Pusher Bluetooth Marketing System will not send anything to him any more.

9. Q: About the statistics, why does it just display one curve when I choose three days?

A: Because the data is the same these three days, the three curves overlay in one place. It occurs mostly when there is no statistics data or all the data is zero. As time pass by, you will see the beautiful curves.

10. Q: Why it fails to broadcast if I use another Bluetooth adapter?

A: This software is an intellectual property of Extreme Blue, so it must go with the adapter shipped with the software to enable the broadcast functionality.

11. Q: What is greeting message?

A: Greeting message is an innovative technology developed by Extreme Blue. The benefits of greeting message are as follows:

- a) Make a user friendly greeting to customer.
- b) Tell the customers what will be sent

Thank you for choosing BT-Pusher device!
